Introduction

Parents and teachers alike will find this book to be a valuable learning tool. The book is divided into 18 spelling lists and 3 review lists. To begin mastering a list, the students are directed to read, write, and organize the words. As they organize the words, students practice many important skills such as alphabetizing, syllabication, and using guide words. Each spelling list includes the following elements:

List Words—The grade-appropriate list words are organized by a specific focus such as common phonetic elements, homophones, adjectives, commonly misspelled words, and many more.

Challenge Words—Five challenge words are included with each list. These words share a common theme and are related to other areas of the curriculum.

Dictation Sentences—A dictation sentence is also included with each list. These sentences use several of the list words and a word from a previous list. These sentences can be used to help students practice the words and for evaluation purposes.

A variety of fun and challenging practice activities accompany the lists. Completing these activities will give students opportunities to master the spelling of the words as well as practice other important skills, such as completing analogies, finding synonyms and antonyms, and proofreading.

Once students have completed the activities for a spelling list, evaluate their progress by having them write the words on a separate sheet of paper as the words are recited. The dictation sentences can also be used at this time for additional evaluation.

A master list of the words can be found on page 46. This list includes all the list and challenge words. The challenge words are italicized for easy reference.

Take a look at the Table of Contents and you will feel rewarded providing such a valuable resource for your students. Remember to praise them for their efforts and successes!
